CL-ST-II

| CL-31-11  |  |  |              |              |
|---|--|--|--------------|--------------|
| CHECKLIST for omission of temperature rise tests  |  |  |              |              |
|   |  |  | :            |              |
| Nipp  |  | Branch Office Manufacturer name:   |              |              |
| Representative starters:  |  |  |              |              |
|   | Factory  | Representative starters test date:   |              | <u> </u>     |
|   | Item   | Capacity:[kW] Rated voltage:[V] Control circuit voltage:                           | [ <i>V</i> ] |              |
| ☐ Starters  |  | Main circuit load current:[A]  |              |              |
| A.C. motor  |  | Motor starting system: Direct input / Star-delta / Voltage drop                    |              |              |
|   | ☐ D.C. motor   |  |              |              |
| ☐ Controlgear   |  | External dimensions:xxmm]  |              |              |
| Test result list no.:   |  | Opening area: [m²]   |              | <u> </u>     |
| -   |  | Main circuit-breakers: TypeRating(Manufacturer:                                    |              |              |
| Drawing no.:  |  | Electromagnetic contactors: Type Rating (Manufacturer:                             |              |              |
|   |  | In-board mounting devices (Transformers, relays, etc.) total power consumption:    |              | [ <i>W</i> ] |
| The items for omission of temperature rise tests, etc. in <b>2.8.4-1</b> , <b>Part 8 of the Rules</b> [compared to representative starters] |  |  |              |              |
|   |  |  |              | •            |
|   |  |  | (Check if a  | applicable)  |
|   |  | Hull number:   | Identical    | Almost       |
| Inte  | nded use:  | Serial number(s):  | racinicar    | identical    |
| 1   | Capacity:  | [kW] Rated voltage: [V] (Control circuit voltage: [V])                             |              |              |
| •   | Degree of prote  | ction:Motor starting system: Direct input / Star-delta / Voltage drop              |              |              |
| 2   | Main circuit loa   | ad current:[A]   |              |              |
| 3   | Main circuit-bro   | eakers (or electromagnetic contactor) type and rating (manufactures)               |              |              |
| 4   | Cooling vent opening arear: [m²]   |  |              |              |
| 5   | Containers (boa  | rds, boxes, etc.) external dimensions, internal volume and ventilation method      |              |              |
| 6   | Main circuit conductor dimensions, layout, connections and terminal structure  |  |              |              |
| 7   | In-board mounting devices (Transformers, relays, resistors, etc.) arrangement  |  |              |              |
|   | Total power consumption: [W]   |  |              |              |
| 8   |  | nium, semiconductors, other:] and rating   |              |              |
|   | Reactors type ar   |  |              |              |
|   |  | ontracted products is managed by incoming inspection standards                     |              |              |
| 9   |  |  |              |              |
|   | Key working standards, equipment, and operator skills with respect to the production method remain the same or have been improved. |  |              |              |
|   |  |  |              |              |
|   | The facilities, pr   | rocedures and criteria for testing and inspection are under sufficient management. |              |              |
| As stated above, we certify that the, which are surveyed in this time, is   |  |  |              |              |
|   | of the same type, manufactured at the same factory and by the same production  |  |              |              |
| method as the representative starters mentioned above.  |  |  |              |              |
|   |  |  |              |              |
| Testing and Inspection Director:  |  |  |              |              |
