

Subject :

Confirmation of Calibration Records
of Pressure Gauges on Board Ships

NKTECHNICAL INFORMATION

No. : 126

Date : 25 January 1994

To Shipowners concerned

The pressure gauges of boilers are to be calibrated periodically. We have instructed all our surveyors to check the calibration records of the pressure gauges kept on board ship and make sure that they are properly calibrated, in principle annually.

We would very much appreciate your cooperation with us in calibrating the pressure gauges annually and keeping the records of them on board ship so that they can be available for the checking by our surveyors.

Should you have any question on this matter, please feel free to contact the Survey Department of the Head Office.
