INFORMATION OF PSC CAMPAIGN

NKTECHNICAL INFORMATION

No.: 154

Date: 12 December, 1994

To Shipowners concerned

This is to bring to your attention that the Paris MOU had decided that Pilot Ladders and Pilot Hoists are to be dealt with as high priority inspection items at Port State Control for a certain period. The MOU secretariat will issue a circular to this effect and this campaign is expected to last for three months from January 1995.

Please note the above and enhance the routine maintenance of Pilot Ladders and Pilot Hoists as well as other safety equipment so that your ships shall not be detained for deficiencies at the ports of Paris MOU member countries.
