

Subject

Stretchers for Greek flagged ships

ClassNK

Technical Information

No. TEC-0559

Date 25 December 2003

To whom it may concern

The Greek government has notified ClassNK of stretchers as follows:

At least one stretcher which complies with the following requirements is to be provided for ocean going ships and fishing ships notwithstanding their size.

1. Stretcher construction

- (1) Stretchers must be made of dure, stainless material.
- (2) Two longitudinal carriers of at least 2m in length should be provided left and right.
- (3) In case of folding type stretchers, folding mechanism should be constructed so as carriers are not damaged, either in longitudinal or in transverse direction, depending on the folding type (longitudinal or transverse).
- (4) Floor supports to be provided for the horizontal position of stretcher.
- (5) Four handles should be provided for the carriage of sick or injured persons.
- (6) The minimum dimensions of the stretcher should be 2m in length and 0.45m in breadth.
- (7) In general, stretcher should be constructed in a way to avoid further injury of the carried person.

2. Stretcher material

Material should be watertight so as no liquids from the carried person are absorbed, and must be easily cleared with soap or antiseptic liquid without being destroyed.

3. Carrying capacity / safe load

The carrying capacity / safe load of the stretcher must be at least 150kg.

4. Fastening belts

Stretchers should be provided with at least two fastening belts with quick release mechanism for the fast and safe transport of the carried person.
